- Wi-Fi Standalone Smoke Sensor
- Infrared Photoelectric
- Alarm Notifications
- DIY

SMOKE DETECTION
BATTERY BACKUP
WIRELESS CONNECTIVITY
MOBILE APP INTEGRATION
CARBON MONOXIDE DETECTION

SMOKE DETECTOR

WIFI & WIRED NETWORKING

WIFI HOME NETWORK - The easiest, least expensive way to connect the computers in your home is to use a wireless network, which uses radio waves instead of wires. The absence of physical wires makes this kind of network very flexible.. The downside is that wireless connections are generally slower than Ethernet connections and they are less secure unless you take measures to protect your network

WIRED NETWORK - Wired networks provide users with plenty of security and the ability to move lots of data very quickly. Wired networks are typically faster than wireless networks, and they can be very affordable.

COMPUTERS

PA SYSTEM

A public address system (or PA system) is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. PA system generally used for live music and announcements.

PA SYSTEM

SPEAKERS
AMPLIFIER
MIXER
MICROPHONE
VOLUME CONTROLLER

UPS & INVERTERS

An UPS or uninterruptible power supply is a device that provides emergency power to an electronic system in the event of a power outage. UPS protects devices from electrical spikes and surges as well as power outages so your electronics remain on

UPS

PROTECTS FROM POWER OUTAGES AND POWER SPIKES

PROTECT AGAINST POWER INTERRUPTIONS

REFINE THE QUALITY OF THE POWER

INVERTER

An inverter provides an ac voltage from dc power sources and is useful in powering electronics and electrical equipment rated at the ac mains voltage. In addition they are widely used in the switched mode power supplies inverting stages.
