VMS SOFTWARE

BENEFITS OF CCTV SYSTEM

- Security and Crime Deterrence
- Employee Safety
- Theft and Shoplifting
- Employee Productivity
- Employee and Customer Interactions
- Unauthorized Access
- Documentation of Incidents
- Evidence for Liability Claims
- Business Analytics
- Parking Lot Safety
- Visitor Management
- Customer Disputes

CCTV SOLUTIONS

- Live & Recorded View
- Remote Viewing Solutions
- Audio Recording
- Color Vision in Night
- Two way Talking
- Alerts & Notifications
- Facial Recognition
- Line Crossing
- People Counting
- Heat Mapping
- POS Integration
- Queue Management
- N+1 Hot Spare connection
- RAID Enabled

BIO-METRIC ATTENDANCE SOLUTION

Biometric attendance solutions are widely used in offices for efficient and secure employee time and attendance tracking. This involves choosing the right system that meets the organization's needs for accuracy, efficiency, and convenience.

WIFI BASED SYSTEMS

CUSTOM REPORTS

SCHEDULING & NOTIFICATIONS

EMPLOYEE SELF LOGIN PORTAL

BENEFITS OF ATTENDANCE SOLUTION

- Improves Office timing & Punctuality
- Prevents Time Theft and Buddy Punching
- Real-Time Monitoring of Employee Attendance
- Improves Employee productivity & Efficiency
- Reduces Payroll Processing Errors
- Compliance with labor laws and regulations
- Prevents Unauthorized Access
- Overtime Management
- Improves Employee Satisfaction
- Remote Attendance Marking
- Transparent and Fair Attendance Policies
- Centralized Management of Reports
- Customized Reporting and Analysis

SOLUTIONS

- Employee Attendance
- Shift Management
- Leave & Permission Management
- Holiday Management
- Alerts & Notifications
- Employee Management
- Automatic Scheduling of Reports
- Customization of Reports
- Multiple Organization Reports
- Mobile Punching
- Geo Fencing

ACCESS CONTROL SOLUTIONS

Access control solutions is a centralized systems that manage and control access to different areas within the office. This system for offices play a crucial role in ensuring the security and safety of the premises. These systems help regulate and monitor the entry and exit of individuals, protecting sensitive areas and assets.

BENEFITS OF ACCESS CONTROL

- Enhanced Security by Regulating the Access
- Protection of Assets
- Employee Safety
- Visitor Management
- Reduced Risk of Unauthorized Access
- Employee Productivity
- Customized Access Permissions
- Audit Trails and Reporting
- Brand Image and Reputation

SOLUTIONS

- Single Door Access Control
- Multi Door Access Control System
- Multi Door Access Control System
- Glass Door Access Control
- Wooden Door Access Control System
- Cloud-Based Access Control
- Flap/ Swing Barriers integration
- Remote Opening
- Mobile-Based Authentication
- Access Control Software
- Alerts & Notifications
- Mobile App

SMART OFFICE SOLUTIONS

Smart office solutions leverage advanced technologies to create more efficient, connected, and user-friendly workplaces. These solutions are designed to enhance productivity, improve energy efficiency, and provide a better overall experience for employees.

SMART LIGHTING SOLUTIONS

SMART HVAC SOLUTIONS

OCCUPANCY SENSORS

SMART MEETING ROOM SOLUTIONS

VOICE ACTIVATED ASSISTANCE

SMART PLUGS

SMART CURTAIN

SMART SHUTTER

ENERGY MANAGEMENT SOLUTIONS

CENTRALIZED MANAGEMENT

SCHEDULING & CONTROLLING

BENEFITS OF SMART OFFICE SOLUTIONS

- Energy Efficiency
- Energy Monitoring
- Cost Reduction
- Enhanced Productivity
- Automation of Routine Tasks
- Optimized Space Utilization- Occupancy Sensor
- Automated Scheduling
- Analytics and Reports

SOLUTIONS

- Smart Lighting Solution
- Energy Saving Solutions
- Temperature Control Solutions
- Smart Plugs & Energy Monitoring Solution
- Smart Switches
- Smart Meeting Room Solutions
- Security Alarm Integration
- Scheduling & Controlling
- Centralized Management
- Voice Assistance

EPABX SYSTEM

EPABX and IPBX (Internet Protocol Private Branch Exchange) are both types of private branch exchange systems used in business environments to manage internal and external telephone communication.

BENEFITS OF EPABX / IPBX SYSTEM

- Internal Communication
- Cost Savings
- Call Routing & Management:
- Efficient Call Handling
- Convergence of Data & Voice Networks
- Remote Extensions & Telecommuting
- Centralized Management
- Employee Efficiency
- Support for Mobility
- Integration with Other Systems

SOLUTIONS

- EPABX Solutions
- Intercom Solutions
- IP PBX Solutions
- Retail PABX Solutions
- VoIP Solutions
- Analog and IP Phones
- Desktop & Cordless Phones
- Call Forwarding and Conferencing
- Unified Communication
- Hybrid Communication

PUBLIC ADDRESSING SYSTEM

A Public Address (PA) system for an office is a communication tool that facilitates announcements, broadcasting, and information dissemination to a large number of people within the office premises. It is commonly used in various settings, including office buildings, conference rooms, lobbies, and common areas. The primary purpose of a PA system is to make announcements, provide information, or broadcast music to ensure that everyone in the designated area can hear the intended message.

BENEFITS OF INTRUDER ALARM SYSTEM

- Detects unauthorized access or intrusion
- Deterrence and Prevention
- Access Control Integration
- Detects Fire and Smoke
- Environmental Monitoring
- 24/7 Monitoring
- Integration with Surveillance Cameras
- Manual Alerting in Emergencies
- Integration with Building Management Systems
- Notification and Communication
- Remote Monitoring and Controls
- Compliance with Regulations
- Insurance Premium Reduction
- Schedule & Control
- Server Room Protection

SOLUTIONS

- Wired Alarm System
- Wireless Alarm System
- Door and Window Sensors
- Motion Detectors
- Glass Break Detectors
- Shock Sensors
- Perimeter Protection
- Panic Buttons
- Access Control Integration
- Audible Alarms and Sirens
- Central Monitoring Station

WIRED AND WIRELESS NETWORKING

WIFI HOME NETWORK - The easiest, least expensive way to connect the computers in your home is to use a wireless network, which uses radio waves instead of wires. The absence of physical wires makes this kind of network very flexible.. The downside is that wireless connections are generally slower than Ethernet connections and they are less secure unless you take measures to protect your network

WIRED NETWORK - Wired networks provide users with plenty of security and the ability to move lots of data very quickly. Wired networks are typically faster than wireless networks, and they can be very affordable.

ROUTERS

ACCESS POINT

NETWORK SWITCH

LOAD BALANCER

FIRE WALL

BENEFITS OF OFFICE NETWORKING

- Efficient and Easy Resource Sharing
- Centralized Data Management
- Collaboration and Real Time Communication
- Reduces the Need For Individual Resources
- Increased Productivity
- Centralized Network Management
- Enhances Data Security
- Protects Against Cyber Threats
- Facilitates Remote Access To The Office Network
- Enabling Employees To Work From Anywhere
- Scalability-Allows for easy expansion of the network
- Simplifies Troubleshooting And Support Tasks
- Supports Backup and Disaster Recovery Plans
- Ensures reliable and fast internet connectivity

SOLUTIONS

- Wired Networking
- Wireless Networking
- Managed Or Unmanaged Network
- Virtual LAN Network
- Network Switches
- Router
- Fire Wall
- Load Balancer
- Access Points
- Load Balancer
- Power Over Ethernet

COMPUTER , PRINTER, SERVER & STORAGE

Structured cabling refers to a standardized and organized approach to designing and installing a cabling system that supports various hardware uses and provides a comprehensive telecommunications infrastructure. The primary goal of structured cabling is to create a flexible and scalable network that can accommodate a variety of devices and technologies while minimizing disruptions and simplifying maintenance.

BENEFITS OF STRUCTURED CABLING

- Flexibility and Scalability
- integrates voice, data, and video, into a single, unified infrastructure
- Ease of Troubleshooting and Maintenance
- Minimizing Network Downtime
- Efficient Cable Management and Separation
- Reducing Signal Interferences
- Adaptability to Technology Changes
- Enhanced Reliability and Redundancy
- Compliance with Standards
- Easy Cable Identification

SOLUTIONS

- 1G, 10G, 25G 40 G Networks
- Fiber Optic Cabling
- Coaxial Cabling
- Unshielded & Shielded Twisted Pair Cabling
- Power over Ethernet (PoE) Cabling
- Structured Cabling for Data Centers
- Horizontal and Vertical Cabling
- Structured Cabling Standards
- Labeling and Documentation
- Server Room
- Cable Management
- Fluke Testing
- OTTR Testing

VIDEO CONFERENCING

Video conferencing solutions facilitate virtual meetings and collaboration, allowing individuals or teams to connect in real-time, regardless of their physical locations. Various video conferencing platforms offer a range of features to enhance communication, collaboration, and productivity.

PTZ CAMERA

CONFERENCING BAR

WEB CAMERA

DOCK STATION

SCHEDULER

HEAD PHONE

BENEFITS OF VIDEO CONFERENCING SYSTEM

- Reduces Travelling Cost And Saving the Time
- Participants to Connect From Different Locations
- Enables Face-to-face interaction
- Allows observing facial expressions & body language of Participants.
- Allows real-time sharing of information and updates.
- Employees can connect regularly without the need of physical presence
- Participants can join meetings from anywhere with an internet connection
- Real Time document Sharing
- Organizations Can conduct training programs & workshops
- Enables the sharing of educational materials & presentations

SOLUTIONS

- Huddle Room Conferencing Solution
- Small to Medium-Sized Meeting Room Solution
- Boardroom/Conference Meeting Room solution
- Web Based Meeting Solutions
- Online Training Solutions
- Wireless Presentation Systems
- Customized and Integrated Solutions

COMMERCIAL DISPLAY SOLUTIONS

Commercial display solutions are diverse and cater to various needs, from digital signage and advertising to collaboration and presentations. Here are some types of commercial display solutions:

COMMERCIAL TV

INDOOR / OUTDOOR VIDEO WALL

INTERACTIVE PANEL

MENU BOARD

DIGITAL STANDEE/ KIOSK

BENEFITS OF COMMERCIAL DISPLAYS

- Enables capturing attention and conveying information more effectively
- Using for branding, promotions, and advertising.
- Increased brand and content visibility
- Real-time information, updates to employees, customers & visitors
- Centralized content management systems
- Interactive presentations in meetings and conferences
- Helps customers navigate large spaces
- Used for efficient queue management & reducing wait times
- Monitoring Surveillance system
- Content can be managed and updated remotely, providing flexibility and agility
- Enhance customer experience in entertainment venues, hotels, and Restaurants with dynamic displays.

SOLUTIONS

- Outdoor / Indoor Video Wall Solution
- Commercial TV
- Interactive panels
- Video Player
- Remote content playing
- Kiosks & Standees
- Hotel menu board solutions
- Cables & connectors

ERP SOLUTIONS

Enterprise Resource Planning (ERP) solutions are comprehensive software systems that integrate and automate various business processes across an organization. These systems facilitate the flow of information and help businesses streamline operations, enhance efficiency, and make informed decisions. Here are key aspects and functionalities of ERP solutions:

BENEFITS OF ERP SOLUTIONS

- Automates repetitive tasks, reducing manual effort and errors.
- Offers up-to-date insights into business operations and performance.
- Visualizes key metrics and trends for informed decision-making.
- Connects different departments and encourages collaboration.
- Facilitates the sharing of information across the organization.
- Minimizes errors in data entry and processing, leading to cost savings.
- Provides the data and insights needed for strategic planning
- Helps organizations adhere to industry regulations and standards.
- Maintains an audit trail for compliance reporting.
- Facilitates a holistic view of customer interactions and history.
- Implements role-based access controls to protect sensitive data.
- Secures data transmission and storage

SOLUTIONS

- Gym Management
- Financial Management
- Supply Chain Management
- Human Resources Management
- Customer Relationship Management (CRM)
- Manufacturing Management
- Project Management
- Asset Management
- Business Intelligence and Reporting
- Compliance and Risk Management
- Mobile Accessibility
- Cloud-Based ERP

POINT OF SALES SYSTEM

The Point of Sale (POS) refers to the location where a transaction occurs between a buyer and a seller. It is often associated with the physical or digital space where a customer makes a payment for goods or services. The Point of Sale (POS) refers to the location where a transaction occurs between a buyer and a seller. It is often associated with the physical or digital space where a customer makes a payment for goods or services

MOBILE POS

ALL IN ONE POS

CANTEEN MANAGEMENT

POS SOFTWARES

BENEFITS OF POS SYSTEM

- Payment Processing & Centralized Data Management
- Inventory Management:
- Ensures reliable and fast internet connectivity
- Stock Tracking & Product availability
- Sales Reporting and Analytics
- Integration with Other Systems
- Print or Digital Receipts
- Invoice Generation
- individual user accounts for employees
- Allows customers to create accounts for personalized services.
- Payment Security

SOLUTIONS

- Retail POS Systems
- Restaurant POS Systems
- Hospitality POS Systems
- Mobile POS Systems
- Self-Service Kiosk POS Systems
- Grocery Store POS Systems

LICENSE FREE WALKIE TALKIES

License-free walkie-talkies, also known as Family Radio Service (FRS) or General Mobile Radio Service (GMRS) radios, are popular for short-range communication without the need for a radio license. These radios operate on specific frequencies allocated by regulatory bodies, such as the Federal Communications Commission (FCC) in the United States. Here are key details about license-free walkie-talkies:

2- 3 km Range

1.5 KM Range

0.5 KM Range

BENEFITS OF ERP SOLUTIONS

- Compact and Portable
- No License Requires
- Simple Operation
- user-friendly controls and straightforward features
- Offer multiple channels for communication to avoid interference.
- Privacy Codes (CTCSS/DCS):reduce interference from other users on the same channel.
- Battery life varies, but many models offer extended use on single charge.
- License-free walkie-talkies are often more affordable than professional-grade radios

SOLUTIONS

- 16 channel walkie talkies
- 99 Channel Walkie Talkies
- 4 Channel Walkie Talkies
- 0.5 KM Range Walkie Talkies
- 1 KM Range Walkie Talkies
- 2-4 KM Walkie Talkies
- Pairing With Other Brands
- Handsfree Bluetooth Connectivity
- Monitoring Display
- Range Boosters

UPS & INVERTERS

An UPS or uninterruptible power supply is a device that provides emergency power to an electronic system in the event of a power outage. UPS protects devices from electrical spikes and surges as well as power outages so your electronics remain on

STANDBY UPS

ONLINE UPS

IN LINE UPS

PARALLEL UPS

INVERTERS

BENEFITS OF UPS & INVERTERS

- Provides a continuous and stable power supply during electrical outages
- preventing downtime and ensuring uninterrupted operation of critical systems.
- Safeguards electronic devices, servers, and data centers against power fluctuations, preventing data loss and corruption.
- Protects computers, servers, networking devices, and telecommunications equipment, from power surges and spikes..
- Maintains a consistent and regulated voltage output.
- Stabilizes voltage levels during brownouts and fluctuations.
- Allows for a controlled and orderly shutdown of systems during extended power outages.
- UPS systems offer remote monitoring capabilities, IT enables power status, receive alerts, and manage the UPS remotely.
- Implements role-based access controls to protect sensitive data.
- Minimizes downtime for businesses and preventing financial losses associated with interrupted services.

SOLUTIONS

- Emergency Lighting
- Data center & Servers protection
- Network Equipment protection
- Desktop Computers and Workstations
- Telecommunication Systems
- Security Systems
- Medical Equipment
- Retail Environments (POS Systems):
- Emergency Lighting Systems
